Profile

Full-Stack Developer with proven experience delivering end-to-end web applications — from responsive React.js frontends to robust Node.js, NestJS, and Python/Django backends. Skilled in REST API design, database management (PostgreSQL, MongoDB, MySQL), third-party integrations, and performance optimisation. Experienced with React Native and Angular for cross-platform and enterprise frontends. Comfortable working independently or within cross-functional teams, with strong client communication skills.

Professional Experience

- Full Stack Software Developer, Hippomed AI**05/2025 – 10/2025
Tunis, Tunisia
- Built component-based frontends with Angular and RxJS, delivering responsive, visually polished UIs consumed by real end users from day one.
 - Developed and integrated RESTful APIs using Spring Boot with authentication, role-based access control, and third-party service integration.
 - Built internal admin tooling with Python/Django, contributing to both backend logic and database management.
 - Delivered hybrid mobile apps with React Native (Ionic) for iOS and Android, ensuring consistent cross-platform UX.
 - Used Git/GitHub for version control across cross-functional team workflows; validated APIs with Postman.
- Full stack developer intern, Wowsoft**07/2024 – 08/2024
Tataouine, Tunisia
- Built responsive frontends with Next.js and TypeScript, implementing SSR and seamless REST API integration for production-ready features.
 - Maintained code quality and documentation standards throughout the stack, ensuring scalable and maintainable frontend architecture.
 - Optimised component structure and data-fetching patterns for performance across devices.

Projects

- Skilline, Gamified learning platform**03/2025 – 04/2025
- Built a full-stack learning platform with React and TypeScript, featuring flashcard creation, spaced-repetition flows, leaderboards, and social interactivity — with a strong focus on engaging UI/UX and smooth animations using Framer Motion.
 - Integrated Gemini API for AI-powered content suggestions — direct experience building user-facing AI-driven product features.
 - Maintained clear component documentation and a consistent design system using ShadCN UI and Tailwind CSS.
 - Tech: React, Next.js, TypeScript, Tailwind CSS, ShadCN UI, Framer Motion, Express, Gemini API
- Prestige Deco, Full-stack e-commerce app**03/2025 – 04/2025
- Delivered a responsive, performance-optimised e-commerce UI with product listings, category filtering, and persistent cart logic across devices.
 - Integrated RESTful APIs for product and cart management; applied Tailwind CSS and ShadCN UI for a consistent, modern design system.
 - Tech: Next.js, TypeScript, Express, MongoDB, Mongoose, Tailwind CSS, ShadCN UI

Task Vortex, *Project management tool*

08/2025 – 10/2025

- Designed and built a real-time collaborative frontend with React and TypeScript — drag-and-drop task boards, live WebSocket updates, and a fully responsive layout.
- Integrated NestJS backend APIs with Tanstack Query for efficient server state management; enforced end-to-end type safety with Zod.
- Reduced perceived API latency by ~40% through Redis caching; documented component architecture and API contracts throughout.
- Tech: React, TypeScript, Tailwind CSS, ShadCN UI, NestJS, Tanstack Query, Zod, WebSockets, Docker, Redis

Skills

- **Languages:** JavaScript, TypeScript, Python, Java, C#, PHP (fundamentals).
- **Frontend:** React.js, Next.js, Angular, React Native, Ionic, TailwindCSS, ShadCN UI, Bootstrap.
- **Backend & APIs:** Node.js, Express, Fastify, NestJS, Python/Django, Flask, FastAPI, Spring Boot · REST API design, third-party integrations.
- **Databases:** PostgreSQL, MongoDB, MySQL, Redis · Schema design, query optimisation, Prisma, Mongoose.
- **DevOps & Tools:** Git / GitHub, Docker, Nginx, WebSockets, BullMQ.
- **AI Tools:** GitHub Copilot, Gemini API, AI-assisted development workflows.

Education

Full stack software development, *Coding Dojo*

12/2024 – 05/2025

Full-stack development covering MERN, MEAN, Spring Boot, and Flask. Built full-stack apps with RESTful APIs, authentication, and integrated frontends with backends and databases.

Ariana Tunisia

Diploma in Thermal Engineering & Renewable Energies,

09/2019 – 06/2022

Higher Institute of Technological Studies

Tataouine, Tunisia

Specialized in sustainable energy systems, thermodynamics, and energy efficiency. Applied knowledge through practical projects focused on green tech solutions

Certificates

Backend development

Built RESTful APIs with Node.js and Express, managing data via MongoDB/Mongoose and implementing authentication, routing, and CRUD operations.

Mobile Development

Developed cross-platform mobile apps with React Native for iOS and Android, integrating APIs with Redux for state management.

Responsive Web Design

Developed mobile-friendly, accessible websites using HTML5, CSS3, Flexbox, and Grid.

Languages

Arabic, English, French

Soft skills

Problem-solving • Teamwork • Adaptability • Time Management • Communication • Analytical Thinking • knowledge sharing
